

IFEN FARIDIAN RAHMADAN

+6285726265851 | ifenfaridian@gmail.com | https://linkedin.com/in/ifen-faridian | https://github.com/jeddenkah

Adaptive, innovative, and agile are the three main things in my personality. My interest in technology brings me to follow and observe details from current and future application development. Furthermore, I learn a lot about coding because I want to work in the software development field

Pengalaman Kerja

PT. Astra Otoparts Tbk. Nusametal Division - **Jakarta, Indonesia** Jan 2026 - Jun 2026

Expert of Industrial Engineering

- Conduct research and identify emerging technologies (related to IT) to support and optimize manufacturing processes.
- Supervise application development activities, ensuring adherence to requirements, quality standards, and project objectives.
- Stack Used: RabbitMQ, Docker, IIS, etc.

PT. Astra Otoparts Tbk. Nusametal Division - **Jakarta, Indonesia** Jan 2025 - Dec 2025

System Integrator

- Decided on the appropriate programming technology stack based on project and business requirements.
- Orchestrated the integration of digital systems within the factory environment, covering both IT and OT domains.
- Conducted research on emerging technologies to support factory digitalization initiatives, including AI Visual Inspection, Machine Learning, WebSockets, and more.
- Ensured server uptime reliability with a target of achieving near-100% availability.
- Responsible for the internal cybersecurity of the factory's MES applications.
- Guided digitalization development initiatives to align with the long-term vision of achieving a sustainable Industry 4.0.
- Developed best-practice base applications and frameworks to enable easier future development and scalability for the programming team.
- Stack Used: Node.js, Express.js, Nest.js, React.js, Python, Flask, FastAPI, Laravel, Bootstrap, MySQL, PostgreSQL, InfluxDB, Redis, Nginx, IIS

PT. Astra Otoparts Tbk. Nusametal Division - **Jakarta, Indonesia** Jun 2023 - Dec 2024

Digitalization Staff

- Gathering requirements from users based on their problems (including problem solving)
- Develope app based on user requirements
- Coordinate with relevant parties regarding the use of the application
- Integrating Programmable Logic Controller (PLC) with Web Programming
- Stack used: Laravel, Node.js, React.js, Bootstrap, MySQL, PostgreSQL, Redis

Bandung Techno Park - **Bandung, Indonesia** Jul 2022 - Feb 2023

Fullstack Web Developer

- Develop Career Development Center (CDC) Website for University both CMS and frontpage
- Stack used: Laravel, PostgreSQL, Bootstrap, jQuery

BuildWith Angga - **Bandung, Indonesia** Nov 2021 - Jan 2022

Laravel Backend Developer Intern

- Develop and maintain the main website of BuildWith Angga
- Fix 23 crucial bug on main website and CMS
- Develop Chart Member Analytics to spectate information about member types
- Stack used: Laravel, MySQL, Bootstrap, Redis

Panak.id - **Bali, Indonesia** May 2021 - Aug 2021

Fullstack Web Developer Intern

- Create Panak.id as a company website for livestock crowdfunding and build company blogs named Edunak
- Develop e-commerce named Pasarnak for selling processed livestock products
- Project Based
- Stack used: Laravel, MySQL, Bootstrap

Edura Indonesia - **Bandung, Indonesia** Jul 2020 - Dec 2020

Fullstack Web Developer Contract

- Advance a web application for tryout tests, from creating exam questions, exams, as for as progress reports.

- Project Based
- Stack used: Laravel, Vue.js, MySQL, Bootstrap

Faculty of Industrial Engineering Telkom University - **Bandung, Indonesia** Jun 2020 - Sep 2020

Junior Programmer

- Expand a SOFI (Sidang Online FRI) which is a web application for managing student final assignments from submission, scheduling, up to graduation results.
- Officially used since 2020 at the Telkom University Industrial Engineering Faculty, and succeeded in shortening the process and making the entire process 100% digital in one app.
- Project Based
- Stack used: Bootstrap, Laravel, MySQL

Jenjang Pendidikan

Universitas Telkom - **Kabupaten Bandung, Indonesia** Aug 2018 - Sep 2022

Bachelor of Information Systems, 3.86/4.00

- Final Assignment : Auto Plotting for Final Assignment Proposal Assessors using Constraint Programming Satisfiability (CP-SAT) Algorithm with Google OR-Tools. Stack used: Python, Google OR-Tools, CP-SAT Algorithm, Node.js, React.js, MySQL
- Top 10 Facebook Developer Circle Clash of Code (Competitive Progamming)
- Top 10 Computing Competitive Programming at Telkom University
- 2nd Place for Capture The Flag at Faculty Industrial Engineering Telkom University.
- Practicum Assistant of Basic Algorithms and Programming Course

Pengalaman organisasi

EDE Laboratory Jun 2020 - Jun 2021

Project Lab Assistant

- Recruit and empower lab members to take a part in the projects such as creating websites, and many more related to website developer.
- Three times became a leader from five project works. The team consists of three to seven members.

Daspro Research Group - **Telkom University** Aug 2019 - Aug 2020

Member

- Sharing and learning about Programming

Central Computer Improvement - **Telkom University** Sep 2018 - Sep 2020

Member of Web Development Group

- Sharing and learning about Web Development
- Held workshop event of Web Development consist of 50+ participants

Keterampilan, Prestasi & pengalaman lain

- **Hard Skills** (2025): BNSP Certified - Data Scientist
- **Hard Skills** (2021): BNSP Certified - Junior Web Developer
- **Hard Skills** (2018): SAP Certified - SAP01 Fundamental
- **Hard Skills** (2018): SQL Database
- **Hard Skills** (2018): Laravel Framework, Node.JS, Python, Flask
- **Achievements** (2021): 2nd Place for Capture The Flag at Faculty of Industrial Engineering, Telkom University
- **Achievements** (2020): Top 8 Facebook Developer Circle Clash of Code (Competitive Programming)
- **Achievements** (2019): Top 10 Computing Competitive Programming at Telkom University
- **Projects** (2023): Visibility End to End (MES) : An internal company MES responsible for managing most of the operational process flows—including material movement, production reporting, achievement dashboards, quality assurance, and more—while integrating seamlessly with machines, robots, display screens, and other systems.
- **Projects** (2023): Scan 2 Go : An application for handling goods transactions (Goods Receipt & Transfer Posting) based on item identity scanning and fully integrated with SAP, featuring real-time scan transactions, real-time stock data, and customizable process flows.
- **Projects** (2020): Designed a prototype of a crowdfunding web application named “Berempati” to collect donations and when donators have goods can choose auction and the profits from it will be donated immediately. This prototype was the student’s results of the Website Application Development course assignment. Stack used: Laravel, MySQL, Bootstrap
